24th September 2015

To All Oceania Member Countries
Members of Technical Committee

Dear fellow shooters,

With the Oceania Shooting Federation's Continental Championship preparation underway, it is now time to call for suitably qualified Jury members and range officials; the attached document is required for those seeking Jury Positions.

Where there are more applicants seeking Jury positions than there are positions available then those missing out may be offered alternate roles.

Unfortunately, as always, there is no subsidy for officials or volunteers; this is brought about by the very nature of the event which has significant costs, due in part to the anti-doping costs and range hire.

All information is available on the Oceania website www.oceaniashooting.org and preliminary information has been circulated to those nominated as your Technical Committee representative.

At the request of the Chairman of the Technical Committee, OSF will arrange to conduct a hands on training program for those seeking to start on the pathway to becoming an International Jury or Referee in ISSF disciplines. This will require some theory sessions as well which may, of necessity, need to take place after dinner.

As you will know this event, which covers the ISSF shooting events, is the final chance for those in the Oceania region to gain Quota places for the 2016 Olympic Games in Rio and hence is subject to strict control by the ISSF. An overview of the qualification process is also attached.

It is important to note that the "Finals" of any ISSF event are only open to those nominated (and eligible) for Quota places.

The event is again being hosted by the Australian Federation, "Shooting Australia" and details are also available on their website

Please feel free to contact either Peter Anderson or myself for further information

Yours in sport
Nick
